Methodologies: SOLID, OOP, Design Patterns, Domain-Driven Design (DDD)

EXPERIENCE - 8 YEARS

Genex InfoSys Limited (Augmented Resource of Grameenphone)

August 2024 – Present

Senior Backend Engineer

Dhaka, Bangladesh

- Developed HRM software to streamline employee management and HR processes, including payroll and attendance tracking.
- Built APIs for a mobile app used by GP employees, ensuring secure and efficient data access.
- Converted the system into a Workday-like platform tailored for multinational corporations (MNCs), enabling scalable organizational management across global teams.
- **Technologies Used:** PHP, Laravel, jQuery, CakePHP, VueJs, MySQL, Docker
- **Project:** OneGP App (Google Play Store)

Appnap Technologies Limited

Mar 2021 – Sept 2024

Senior Software Engineer

Dhaka, Bangladesh

- Deployed 40+ high-performing apps to cloud with improved load times and scalability
- Architected scalable social platform serving 5 Million users with 50% engagement increase
- Enabled real-time chat functionality with 30% faster response times
- Implemented secure user communication with encryption and enhanced platform security
- Mentored developers leading to faster development speed and improved code quality
- **Technologies Used:** REST API, PHP, Laravel, NodeJs, Socket.io, Docker, Azure, Terraform, MySQL, Elasticsearch
- **Live Projects:** Walkie Talkie, Heart Rate Monitor, Blood Pressure App, 2FA Auth, Chloe Tracker

Energaia Bangladesh Ltd.

Jun 2019 – Feb 2021

Web Application Developer

Dhaka, Bangladesh

- Built and deployed full-featured farm automation web application using VueJs and Laravel
- Increased efficiency by 20% through implementation of automated emails and cron jobs
- Expanded user base by 30% by implementing multi-language support
- Streamlined deployment processes by implementing CI/CD pipeline using CircleCI
- Developed e-commerce solutions using WordPress, WooCommerce, and integrated secure payment gateways
- **Technologies Used:** Laravel, NodeJs, VueJs, Docker, DigitalOcean, MySQL

W3 Engineers Ltd. & Left Travel

Feb 2018 – May 2019

Junior Software Engineer & Intern

Dhaka, Bangladesh

- Developed responsive web applications using Yii framework
- Created recommendation engine to enhance user engagement through data analysis
- Implemented Agile and Scrum methodologies for efficient project delivery
- **Technologies Used:** Android, Java, PHP, Yii2, Python, HTML, CSS, MySQL, Solr
- **Live Projects:** RentByOwner.com, BedroomVillas.com

TECHNICAL PROJECT LEADERSHIP

Product Owner — EVRM

End-to-end development of a visitor & employee access management system.

Tools & Technologies: Vue.js, Laravel, Node.js, Socket.io, Flutter, Laravel Vapor, AWS

AWS Services: Route53, Lambda, S3, SES, EC2, LightSail, etc.

Key Features:

- **Touchless Sign-In:** QR code or tablet-based entry without physical contact.
- **Kiosk & QR Code Sign-In/Out:** Flexible options for visitors and employees via QR or on-site kiosks.
- **Visitor Pre-Registration:** Hosts can register guests in advance to streamline arrival.
- **Email Notifications:** Automatic notifications to hosts and visitors on arrival and updates.
- **Digital Signature & Terms Acceptance:** Visitors agree to terms and sign documents digitally during check-in.
- **Visitor Screening:** Pre-check screening to ensure compliance and safety.
- **Badge Printing:** Print customized visitor badges on arrival.
- **Emergency Announcements:** Broadcast alerts and facility-wide notifications in urgent situations.
- **Comprehensive Employee Management:** Sign-in/out tracking, remote work integration, roster management and attendance reporting.
- **Meeting Room Booking:** View availability and book rooms with conflict prevention, rescheduling and cancellation via a unified dashboard.
- **Scalability:** Supports unlimited locations, kiosks, visitors and centralized cloud-based administration.

Impact:

- Reduced check-in time and improved accuracy for both visitors and employees.
- Delivered a scalable platform ready for enterprise use.

Web App: EVRM

Android App: Google Play Store

EDUCATION

Patuakhali Science & Technology University

Bachelor of Engineering in Computer Science & Engineering

2014 – 2017

CGPA: 3.174

ACHIEVEMENTS

- Awarded ONE MAN ARMY for exceptional multitasking and leadership within the backend development team
- Received Best Performer of the Month recognition four times in 2021
- Successfully developed and launched EVRM product as Product Owner

LANGUAGE SKILLS

- English: IELTS Score 7 (Listening-7, Speaking-7, Writing-7, Reading-7)
